

## YEAR 10 GCSE Syllabus B

### write up task 4:

Use the template that you have created to write an essay describing how data is input into your project, For example imagine a new client is applying to join the gym / doctors etc.

- How will the data that is needed be gathered?
- Will there be a membership or enrolment form to complete?
- How will the data be entered into the system you have made by the worker whose job it is to do so?
- What features have you made in your project to aid the entry of data.
- What steps have you taken to reduce data input errors?
- What hardware is used to input the data?
- What are the advantages and disadvantages of each type of hardware. Up to{ 20 / 60]

There is a presentation that you should see before you start this task it is called task 4 when the option comes up select read – only to view the show.
